

The English Drama Option presented ZOO, a one-act play by Terry Adlam

Yes, against all odds, the English Drama Option managed to present a show this year. Rehearsals were difficult to organise with home schooling on even days for the 3e students, who were part of the group. Some rehearsals were done via ZOOM, others were put on Friday afternoons instead of the usual Thursdays. To counter the overall dark mood of pandemic times, the director, Tony Kingston produced a short, hilarious play that made the audience laugh out loud.

On 29th April three 4e classes and two 3e classes had the opportunity to see the performance of our five talented actors.

Here is a short review by Elly Speciale 3CC2:

“On Wednesday 29th April our class was one of the lucky ones to be invited to this year’s ODRAM show in E1.05. The event took place during school time and carefully respected the Covid-19 barrier gestures, safety distances, and even the actors were wearing masks during the performance. A big BRAVO for them because it must have been hard.

The play ZOO was a short piece about a zookeeper desperately trying to take control not only in terms of management of his employees, but also his animals. This included a few very funny scenes accompanied by the audience’s laughter. The atmosphere in the “theatre” was relaxing and gave us a break from the pressure of tests and school work. The actors were great and the whole play was good entertainment. Here the Penguin must be mentioned, who certainly contributed to the hilariness of the play.

In conclusion, I was so smitten with the performance that I decided to join the English Drama Option next year. I wouldn’t want to miss this opportunity to get to know more about acting and develop my English language skills. “

Next year ODRAM will also take part in FEST on 18th and 19th March. Here acting groups from different Luxembourgish schools put their plays on at the Kulturhaus in Mersch. This will be a marvellous opportunity to act on a professional stage in front of a larger audience.
